

The following message is from your Homeowners' Association via the KID:

Members of the Cherry Blossom Heights (CBH) Local Irrigation District (LID):

We all want to keep our lawns and landscape looking good this summer. That requires a reliable irrigation system that provides predictable pressure and flow. For various reasons that we in the CBH-LID learned "the hard way" many years ago, it became clear that to assure predictable pressure and flow we needed to work together and develop a voluntary watering schedule designed to even out the demand on the system during peak hours. So we spent a lot of time and effort going door-to-door and developed just such a schedule and have successfully implemented it for several years.

The attached schedule is based on our previous schedule, which tried to accommodate everybody's system and personal schedule while still ensuring reliable pressure and flow during prime watering periods. The schedule divided our district into a series of zones (based on the system configuration) and ensured that no more than one or two lots would be watering at the same time in any given zone at any given time.

We consulted with WSU "Master Gardeners" to identify the optimal watering durations and frequency and decided that 30-40 minutes per day 1-3 times a week made the most sense.

The experts stressed several key points:

- Watering frequency should be 1-3 times per week, depending on weather (3 times per week is only required during extreme hot/dry spells)
- Watering more than three times a week (or in the evenings or at night) may promote insects, disease and shallow roots.

Assuming that most lots would not need more than 3 or 4 "time slots" to cycle through all their stations for 30-40 minutes each, we decided that we could build our schedule around 2 hour blocks of time with each lot getting 3 time-blocks per week either on Monday-Wednesday-Friday or Tuesday-Thursday-Saturday. Such a schedule would also accommodate those with computer timers.

We also wanted to make sure that everybody had the opportunity to water during the day (for the reasons stated above) so we made sure that all the scheduled time-blocks were during the morning or the afternoon. (Note that the afternoon blocks are 30 minutes longer to account for the warmer temperatures during that time of the day).

Finally, we wanted to allow people the ability to do additional watering if they felt they needed to, so we designed the schedule to allow "open watering" in the evenings (after 5:00 PM) and at night (before 3:30 AM) and also all day on Sundays. Of course, during these times, people would not be assured of good pressure/flow since there would be nothing to limit the number of users at any one time.

The end result is the attached schedule. **Note that this is the official schedule for our LID and that it will be used in place of any schedule that has been suggested for KID as a whole.** For those of you familiar with the old schedule, you should see no change from previous years. For those of you seeing this for the first time, please begin following the schedule as soon as possible. The schedule is listed by street and then address. Go down the list until you find the row with your address and then go across the row to see your assigned watering schedule. If your schedule indicates “Night Only” that means that in past years you had indicated that you preferred to water at night rather than the day (which is perfectly OK although not recommended by the experts).

We tried to accommodate everyone’s needs with this schedule but we realize that it will probably need some revisions. We did not intend to create a hardship for anybody and we are willing to adjust the schedule if needed. If you have any questions or concerns ABOUT THE SCHEDULE, please contact Christopher Larmey, CBH Irrigation Committee (551-3712 or via email at [larmey.junk@charter.net](mailto:larmey.junk@charter.net)). NOTE THAT CHRISTOPHER LARMEY DOES NOT WORK FOR THE KID. HE IS JUST A MEMBER OF THE CBH HOMEOWNERS COMMITTEE.

IF YOU HAVE A PROBLEM WITH THE IRRIGATION SYSTEM, THEN CONTACT KID (586-9111 or <http://www.kid.org>). If you ever have low pressure or no pressure when you attempt to water, please turn off your system and immediately report the problem to KID. Don’t wait for someone else to call. The sooner the KID is contacted, the sooner we can get the system back up and running.

If we all work together we can continue to keep our lawns and neighborhood looking lush, green and beautiful.

Thank You!
